US Department of Energy invests \$78 M in Bioenergy research

Washington, U.S. Secretary of Energy Rick Perry announced four funding opportunities totaling up to \$78 million to support early-stage bioenergy research and development under the Office of Energy Efficiency and Renewable Energy's Bioenergy Technologies Office.

“The Department of Energy is focused on some of the most exciting research opportunities as well as the biggest technological challenges facing our diverse and abundant domestic bioenergy resources,” said Secretary Perry. “Through the funding opportunities announced today, U.S. bioenergy resources, including algae, energy crops, and various waste streams, will be more efficiently and effectively converted into affordable biofuels, biopower, and bioproducts.”
