ETIP Bioenergy Stakeholder Plenary Meeting and ADVANCEFUEL Workshop

The 9th Stakeholder Plenary Meeting of the European Technology and Innovation Platform Bioenergy (ETIP Bioenergy) confirmed the many opportunities already available today to use sustainable biomass for supporting the clean energy transition in Europe. It was complemented by the ADVANCEFUEL Workshop “RESFuels in transport sector decarbonisation” and the Final Forum of the ERA-NET Cofund BESTF3 with a focus on funding the scaling-up of advanced bioenergy technologies.

After some years of hesitation, the sector is now showing concrete signals of a renewed commitment both with new commercial industrial initiatives and in research and innovation.
