IEA Bioenergy: Bio-Carbon Capture and Sequestration/ Utilization

IEA Bioenergy Task 41 organized a workshop on Bio-CC(U)S in Brussels on 16th 2018. The topics of the workshop was market and regulatory issues related to Bio-CCUS. The workshop was divided into four sessions:

- Background and introduction
- Policy perspectives.
- Bio-CCS and Bio-CCU
- Panel discussion

The objective of the workshop was to increase knowledge on the topic and contribute to the definition and establishment of terms drivers and impact mechanisms of the Bio-CC(U)S technologies, and to gather viewpoints of how different industrial sectors, governments and institutions see the implementation of these technologies.
